

SquadSwap: The Future of Decentralized Exchange (DEX)

Table of Contents:

1. Introduction

- SquadSwap Overview
- Token Information

2. Token Distribution and Allocation

- Initial Supply
- Emission Supply
- Initial Swap Event (ISE)
- Squad Holder ISE Bonus
- Squad Holder Airdrop
- Squad Treasury
- Dev Fund
- LP Bootstrap
- Referral Program

3. Governance and Decentralized Autonomous Organization (DAO)

- Pre and Post ISE Governance
- DAO Functions
- Community and Committee Involvement

4. DAO Voting and Decision-Making

- Major Changes and Fund Usage
- Committee and Committee Nominees
- Multi-Sig Transactions

5. Utility and Use Cases

- White Label DEX and Swap
- Shared Liquidity
- Farms, Farm Boosters, and Staking
- Liquid Staking and 3rd Party Integrations
- IFO and Farm Auction
- Revenue Sharing, NFT Boost, and Trading Rewards
- Prediction Market, Lottery, and Games
- Rain/Tip Bot and DEX Tools

6. Fee Structure

- Swap Fee Allocation

7. Committee Nominees

1. Introduction

SquadSwap emerges as a trailblazer in the DEX space, providing users with a feature-rich and community-driven platform. With its strong focus on governance, utility, and user engagement, SquadSwap is poised to revolutionize the decentralized exchange landscape, empowering users to participate in the future of finance.

SquadSwap Overview

SquadSwap is revolutionizing the decentralized exchange (DEX) landscape with its innovative platform. Built by the Squads Community, SquadSwap offers users a wide array of features and utilities. The platform operates using its native token, \$SQUAD, which serves as a medium of exchange and holds significant governance power within the ecosystem.

Token Information

Token Name: Squad (\$SQUAD)

Total Supply: 1,000,000,000

90% - Emission Supply

5% - ISE participants

1% - Squad Holder ISE Bonus

1% - Squad Holder Airdrop (1 year after ISE)

1% - Squad Treasury

1% - Dev Fund

0.5%- LP Bootstrap

0.5%- Referral Program

2. Token Distribution and Allocation

Initial Supply

The initial supply of Squad tokens is set at 1,000,000,000 \$SQUAD, providing a solid foundation for the platform's growth and development.

Emission Supply

To incentivize platform usage and community engagement, 90% of the total supply (900,000,000 \$SQUAD) will be distributed over time through various mechanisms. This emission supply ensures a fair and sustainable distribution of tokens.

Initial Swap Event (ISE)

To jumpstart the platform, 5% of the total supply (50,000,000 \$SQUAD) will be allocated for the Initial Swap Event (ISE). During this event, participants can swap \$CAKE for \$SQUAD over a 7-day period, further enhancing liquidity and participation.

Squad Holder ISE Bonus

In recognition of early supporters and contributors, 1% of the total supply (10,000,000 \$SQUAD) will be allocated as a bonus to all ISE participants that hold a Squad. Distributed proportionally based on ISE contribution.

Squads Holder Airdrop

Also, in recognition of early supporters and contributors, 1% of the total supply (10,000,000 \$SQUAD) will be allocated for airdrop to PancakeSquad holders. This airdrop is a token of gratitude for their commitment to this ecosystem. Airdrop will commence in February 2024 and will be spread out over 12 months to all Squad NFT holders who held it for the entirety of the previous month. Holders will have one month to claim. Any unclaimed tokens will be sent to Squad Treasury and Dev Fund.

Squad Treasury

To ensure the sustainable growth and development of the ecosystem, 1% of total tokens supply will be allocated to the Squad Treasury. The DAO manages this treasury, utilizing the funds for the benefit of the community.

Dev Fund

To support ongoing development efforts, 1% of total tokens supply will be allocated to the Dev Fund. This fund serves as a resource for continuous innovation and improvement of the SquadSwap platform.

LP BootStrap

Bootstrapping the initial liquidity pool on a DEX is crucial for creating a healthy trading environment, encouraging adoption, promoting market efficiency, and ensuring a positive user experience. 0.5% of the supply (5,000,000 \$SQUAD) will be used to bootstrap the initial \$SQUAD/\$CAKE liquidity pool.

Referral Program

The SquadSwap referral program plays a crucial role in expanding the community. Participants have the opportunity to earn tokens through referrals. 0.5% of the supply (5,000,000 \$SQUAD) will be being distributed through this program. Unclaimed amount will be sent to Squad Treasury.

3. Governance and Decentralized Autonomous Organization (DAO)

Pre and Post ISE Governance

Following the ISE, the Squad Airdrop becomes claimable, allowing participants to access their allocated tokens. Additionally, \$CAKE received from the ISE will be sent to the Squad Treasury,

further enhancing the financial resources available to the DAO.

DAO Functions

The DAO exercises governance and decision-making authority within the SquadSwap ecosystem. It plays a crucial role in determining treasury fund usage, major changes to the platform, and the introduction and implementation of proposals. The community actively participates in the DAO by proposing and voting on initiatives, while the committee ensures efficient execution.

Community and Committee Involvement

To foster community engagement, the committee plays a vital role in the DAO. Committee members are responsible for introducing, reviewing, and voting on proposals, as well as signing multi-sig transactions. The initial liquidity pool of \$100k in \$SQUAD/\$CAKE pairs will bootstrap the platform, ensuring a vibrant and robust ecosystem.

4. DAO Voting and Decision-Making

The DAO serves as the primary decision-making body within the SquadSwap ecosystem. It is responsible for overseeing major changes, determining fund usage, and ensuring the platform's long-term success. The committee, comprising nominated individuals such as Kushed, A R, and Baza, plays a significant role in proposing and implementing changes, safeguarding the interests of the community.

5. Utility and Use Cases

SquadSwap offers a comprehensive suite of features and utilities, empowering users to leverage the full potential of decentralized finance (DeFi). These include:

White Label DEX and Swap

SquadSwap provides White Label DEX to partner projects. Enabling 3rd party projects to create their own decentralized exchanges, with their own native pairs, staking pools, and collect fees from supported pairs. Giving White Label partners ability and flexibility to customize the trading experience that is tailored for their user base.

Shared Liquidity

Through Shared Liquidity Pools (SLP), partner projects can access a wide range of SquadSwap Native Farm pairs to add to their own DEX, in process, sharing liquidity and fees. This shared liquidity promotes a vibrant and liquid trading environment with minimal price impact for traders, regardless which partner platform they use.

Farms, Farm Boosters, and Staking

SquadSwap incorporates farming, farm boosters, and staking mechanisms, allowing users to earn rewards by providing liquidity and staking their tokens.

Liquid Staking

The platform enables users to benefit from the advantages of liquid staking, unlocking liquidity while maintaining their staking positions.

3rd Party Integrations

3rd party integrations further enhance the ecosystem, providing users with a seamless experience.

IFO and Farm Auction

SquadSwap facilitates Initial Farm Offerings (IFOs) and farm auctions, enabling token issuers to raise funds and engage with the community in a fair and transparent manner.

Revenue Sharing, NFT Boost, and Trading Rewards

Through revenue sharing, NFT boosts, and trading rewards, SquadSwap incentivizes active participation and rewards users for their contributions to the ecosystem.

Prediction Market, Lottery, and Games

SquadSwap incorporates prediction markets, lotteries, and games, offering users additional avenues for engagement and potential rewards.

Rain/Tip Bot and DEX Tools

The Rain/Tip Bot feature allows users to distribute tokens to the community, fostering a spirit of generosity and collaboration. Additionally, SquadSwap provides a range of DEX tools to empower users in their trading activities.

6. Fee Structure

SquadSwap operates on a sustainable fee structure, with a 0.2% swap fee applied to transactions on the platform. The fee distribution is as follows:

- 20% to Squad Holders
- 20% to LP Providers
- 20% Burned
- 20% to Traders
- 20% to Dev Fund Treasury

This balanced fee allocation ensures that various stakeholders within the ecosystem benefit from the platform's growth and success.

7. Committee Nominees

The committee nominees, Kushed, A R, Baza, and Savage, bring their expertise and knowledge to the SquadSwap ecosystem. They play an integral role in introducing, reviewing, and voting on proposals, as well as signing multi-sig transactions, thereby shaping the future direction of the platform.
